

HD53LS...

2-AXIS ULTRASONIC ANEMOMETER

2-axis ultrasonic static anemometer for measuring:

- Wind speed and direction, U-V Cartesian components of wind speed.
- Wind Gust (only in version with RS485 MODBUS-RTU output).

The average of wind speed and direction over a period configurable up to 10 minutes is calculated.

Two versions are available:

- **HD53LS.A:** with two analog outputs (one for wind speed and one for wind direction), factory configurable among 4...20 mA (standard), 0...1 V, 0...5 V, 0...10 V (**to be specified when ordering**).
- **HD53LS.S:** with RS485 MODBUS-RTU output.

Installation on a \varnothing 40 mm mast.

Supplied with PC software for configuring the instrument and viewing the real time measurements.

Optionally available, ILAC-MRA (ACCREDIA) traceable factory calibration.

ADVANTAGES

- The absence of moving parts minimizes maintenance.
- High sensitivity for detecting very low speeds, which are not detectable by traditional methods.
- Fast and easy installation (on \varnothing 40 mm mast, optional tripod available).
- The low power of the instrument allows installation in remote sites, with power from solar panel and battery.
- The version with RS485 MODBUS-RTU output allows instrument networking.

TYPICAL APPLICATIONS

- Weather stations
- Environmental monitoring
- Agriculture
- Sports facility
- Marine and Harbour applications
- Airports
- HVAC
- Construction
- Renewable energy
- Building automation

TECHNICAL SPECIFICATIONS

Wind speed	
Sensor type	Ultrasonic
Measuring Range	0...50 m/s
Resolution	0.1 m/s
Accuracy	± 0.2 m/s or ± 2%, the greatest (0...35 m/s) / ± 3% (> 35 m/s)
Wind direction	
Sensor type	Ultrasonic
Measuring Range	0...359°
Resolution	1°
Accuracy	± 2° RMSE from 1.0 m/s
General features	
Power supply	10...30 Vdc (15...30 Vdc for version with 0÷10 V analog output)
Power Consumption	26mA @ 12Vdc
Analog output	2 analog outputs: one for wind speed and one for wind direction (only in HD53LS.A). Analog output type is 4...20 mA as standard; 0...1 V, 0...5 V or 0...10 V available on request . Analog output refresh rate 1 Hz.
Digital output	RS485 MODBUS-RTU (only in HD53LS.S)
Averaging interval	Configurable from 1 s to 10 min
Electrical connection	M23 connector
Operating temperature	-20...+55 °C
Survival speed	90 m/s
Dimensions	H=179mm, Ø=150mm
Weight	640 g approx.
Housing	ASA with metallic parts in AISI 316
Protection degree	IP66
Installation	On mast Ø 40 mm external and Ø 36 mm internal

ORDERING CODES

HD53LS.A 2-axis ultrasonic static anemometer. Analog output factory configurable among 4...20 mA (standard), 0...1 V, 0...5 V, 0...10 V (**to be specified when ordering**). Power supply: 10...30 Vdc (15...30 Vdc for 0...10 V analog output). Installation on a mast: external Ø 40 mm, internal Ø 36 mm. Input with M23 connector. It includes HD52.3DS software downloadable from Delta OHM website. Supplied with M23 movable connector. **On request CP52... cable.**

HD53LS.S 2-axis ultrasonic static anemometer. Digital RS485 MODBUS-RTU output. Power supply: 10...30 Vdc. Installation on a mast: external Ø 40 mm, internal Ø 36 mm. Input with M23 connector. It includes HD52.3DS software downloadable from Delta OHM website. Supplied with M23 movable connector. **On request CP52... cable.**

ACCESSORIES

CP52.5 Cable with 19-pole M23 connector on one end, open wires on the other end. Length 5 m.

CP52.10 Cable with 19-pole M23 connector on one end, open wires on the other end. Length 10 m.

CP52.15 Cable with 19-pole M23 connector on one end, open wires on the other end. Length 15 m.

CP52.20 Cable with 19-pole M23 connector on one end, open wires on the other end. Length 20 m.

CP52.30 Cable with 19-pole M23 connector on one end, open wires on the other end. Length 30 m.

CP52.50 Cable with 19-pole M23 connector on one end, open wires on the other end. Length 50 m.

CP52.75 Cable with 19-pole M23 connector on one end, open wires on the other end. Length 75 m.

HD52.30K Birds spikes.

HD2005.20 Tripod with adjustable legs for installing environmental sensors. Material: anodized aluminum. Max. height 2 m. It can be fixed on a flat base with screws or to the ground with pegs. Foldable legs for the transport.

HD2005.20.1 Tripod with adjustable legs for installing environmental sensors. Material: anodized aluminum. Max. height 3 m. It can be fixed on a flat base with screws or to the ground with pegs. Foldable legs for the transport.
