The LP 471 PYRA... probes consist of a pyranometer LP PYRA 03, LP PYRA 02 or LP PYRA 10 equipped with the SICRAM module and a 5m or 10m cable for the connection of the pyranometer to the instruments D09847, HD2102.2, HD2102.1 and HD2302.0, so to get the reading in W/m<sup>2</sup> directly on the instrument's display. The LP PYRA 03 is a second class pyranometer, the LP PYRA 02 is a first class pyranometer and the LP PYRA 10 is a "Secondary standard", all according to ISO 9060. The instruments are supplied with their Calibration Report and M12 4-pole output connector. The manuals of the pyranometers LP PYRA 03, LP PYRA 02 and

LP PYRA 10 are available in our website [www.deltaohm.com](http://www.deltaohm.com): "Instruments > Environmental Analysis".

The SICRAM module of the LP 471 PYRA... shows the same serial number of the pyranometer and its setting takes into account the sensitivity shown on the calibration report of the pyranometer, therefore it is not possible to use the same module to perform measurements with different pyranometers.
